

29 April 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Senior Staff Meeting, 13 April 1964

25X1 1. [] stated that the current drives were not yet finished but that we would meet our quota.

2. Colonel White mentioned his upcoming trip, which he stated was primarily for the purpose of surveying our communications activity. He said that he would be glad to take up any problems, upon request, in the areas to which he was going.

3. Mr. Hughes talked for about twenty minutes and answered several questions. He said that in the past INR had produced many relatively useless research papers. He and his office are now trying to produce material that will lie in an appropriate spot between intelligence and policy; this material should not be academic research nor should it be too close to policy papers. Secretary Rusk desires a trim office to produce material of real value. The office is therefore somewhat in the position of brokering between the total flow of intelligence funneling through INR on its way to the policy makers.

Mr. Hughes has the liaison responsibilities of INR with the Agency, DIA and the FBI.

Mr. Hughes stated that he believes the CIA and State relations are good.
